

Sprint 2 Plan

Heading: Sprint 2 plan, MemLoc, Remind by Location, sprint completion date: 02.08, rev 1, 01/26/2022

Goal: Build out location integration with frontend and backend (early building phase)

Task listing

User story 1 : As a user I want to be able to provide my location and see visual feedback (13 points)

1. Build js web router (4h)
2. Build interface between iOS location app and js backend (4h)
3. Provide API for frontend to use (4h)
4. Integrate FE and BE functionality (3h)

User story 2: As a user I want to be able to get input reminders at a specific location and times so that I can later on be conveniently be reminded at the place and time. (8 points)

1. Adding a location input that will give coordinates that can later be sent to the backend (through an API)(4h)
2. Get coordinates from the location that can be sent to the backend (1h)
3. Adding a calendar date that can compare to the current date (through API)(4h)
4. Get the time stamp that can be compared to current time(1h)

Team roles:

Alexandra: Frontend

Mythili: Scrum Master, Backend

Abirami: Frontend
