Sprint 1 Report,

Product Name: MemLock
Team Name: Remind by Location
Date: Jan 26

- **Actions to stop doing:**
  - Thoroughly plan what the mvp will need before execution. We spent a lot of time learning technologies that we decided to scrap towards the end of the sprint so this wasted a lot of time and effort.
- **Actions to start doing:**
  - Take more time to think about how long things will actually take. We underestimated some elements of our project initially
  - Try and think through the potential problems our solutions have beforehand
- **Actions to keep doing:**
  - Regular check in meetings to make sure everyone is on the same page and adjust any tasks to better aim for a MVP
- **Work completed/not completed:**
- Completed:
  - Basic Front end running with a chart that can be adjusted later on
  - Was able to learn technologies needed for project:
    - New languages (Javascript, Go(no longer using))
    - New environments (React)
    - InfluxDB (no longer using)
  - Readjusted project scope to better fit our timeline of 10 weeks
    - Removed need for backend database
    - Will be doing everything in javascript
- Not Completed:
  - Scraped Ideas:
    - Adding pages for multiple users
    - Using a database for backend

- **Work completion rate:**

Final Burn-up chart Sprint 1
